

Bless Your Sole!

Mountain Podiatry and Fützpah 118 fuse spa pampering with medical technology.

Picture this: you head to the spa for a day of beauty, and you come back with ... an infection? It's not a farfetched story – unfortunately, it's an all too common occurrence. As a second-generation podiatrist, Dr. Jodi Politz has seen more than her share of such cases. Frustrated with the volume of

warts, ingrown toenails, and infections that her patients were getting from spa pedicures, and aware of the risks such treatments can run to her diabetic patients, Dr. Politz decided to remedy the situation. She created an extension of her medical facility, Mountain Podiatry, which would provide clients a much-needed fusion of upscale spa services and medical supervision. Thus, Fützpah 118 was introduced to Las Vegas: the pampering ambiance of a high-end salon with the hygienic standards of a medical clinic.

Your tootsies (and 'tips) are in for a treat at Fützpah 118, where you'll find a spa menu full of lavish choices, from therapeutic massages to paraffin wax treatments to polish. "Sexy in Summerlin," for example, is a 75-minute pairing of a full manicure and the popular, toe-curling "Fützpah Footsie" pedicure. Specialty pedicures for pregnant women, athletes, and sufferers of diabetes round out the extensive selection. And what spa would be complete without amenities? Fützpah 118 has plenty of those. Neck warmers, eye pads, flat-screen televisions, and complimentary refreshments are

just a few – whether you need a snack, a glass of wine, or can't miss your favorite show, the facility goes the extra mile to indulge its guests.

It isn't just the high-quality salon services that set Fützpah 118 apart; it's the absolute sterility. After all, it's a spa run

by a *doctor*. "Everything is medically sterilized,"

asserts Dr. Politz. One-use kits eliminate all risk of infection.

Fützpah 118's sleek, elegant Murano pedicure chairs are

specially designed with Crystal Clean Pipe-Free™ technology, which replaces traditional jets and internal water lines that can harbor

dangerous bacteria. The

staff is physician trained and supervised, and spa-goers have the benefit of an on-site podiatrist. Fützpah 118 offers a rare and valuable combination – the quality services you'd expect from a traditional spa, and the security of knowing that all precautions have been taken to ensure a healthy visit.

Since it's conveniently located adjacent to Mountain Podiatry, in a medical building, many clients stop by for a pedicure while waiting for another appointment. But you don't have to be a patient of the clinic to enjoy all the luxuries that Fützpah 118 has to offer; you only need the desire to relax and be pampered in a safe, soothing environment. If that sounds like you, let your feet do the walking to Mountain Podiatry – they'll thank you for it later.

Call (702) 240-8038, or visit www.futzpah118.com or www.mountainpodiatry.com for details.
